

Kindness Challenge 2022

Kindness is scientifically proven to increase energy, make you feel happier, lower your blood pressure, and it might help you live longer. It can also reduce pain, stress, anxiety, and depression. Plus, kindness is contagious! The positive effects of kindness are experienced in the brain of everyone who witnessed the act, improving their mood and making them significantly more likely to “pay it forward.”

The challenge: Show kindness every day Nov 13-17! Each day represents a different group/individual. Need some ideas? Check out our list of suggestions on page 2.

The reward: Besides feeling good about yourself and the health benefits listed above! Happy is the New Healthy!
